

# FUCK Token Whitepaper v1.0

Built on the Ethereum Blockchain

Welcome to a world where everyone gives a FUCK. Dozens of ICOs are popping up daily, all with empty promises of how they will change the world. They spew enticing buzzwords and confusing rhetoric just to make you invest in their idea. With FUCK tokens, we present a unique opportunity to express how you *really* feel.

Cryptocurrencies are breaking down the barriers of society, revolutionizing currency as we know it and FUCK token is at the forefront of the fight.

In today's society, we have an epidemic where millions of people have **no fucks to give**. With our ERC-20 FUCK token we have solved the "lack of FUCKs" problem. Tip your friends 0.001 FUCKs, or 1 FUCK, it doesn't matter how many FUCKs you give. All that matters is you are contributing something to society.

## Vision

We envision an ecosystem where FUCKs are distributed through tips. You laughed at a shitpost on Reddit? Show them your appreciation by giving a FUCK. Your friend is sulking about his marital problems? Give him a FUCK or two and watch his smile brighten up. Being cyber-bullied for being a crypto nerd? Send them 10,000 digital, decentralized, middle fingers with FUCK token. Remember, we are here to make the world a better place.

## Team

While this is a massive vision, FUCK token has an experienced and enthusiastic team who are ready to make this vision a reality. We are determined to see FUCKs distributed throughout the community.

## Tip Bot

We are currently developing a tip bot that can send FUCKs to anyone on Reddit, on any subreddit. Integration into Slack, Twitter, and Twitch are also in the works and we expect widespread adoption of FUCK token. By tipping FUCKs, you are not only contributing to the FUCK token ecosystem, you are indirectly exposing newcomers to the Ethereum network. Imagine a world where thousands of FUCKs are given every minute.

### **Initial Coin Offering**

In order to bring FUCK token into the mainstream, we are raising funds through an ICO. Most exchanges require a 3 BTC (approximately \$8,100 or 29 ETH) fee for listing, and we would like to see FUCK token initially listed on four or more exchanges.

### **Allocation of Funds**

Our presale goal is 10 ETH.

Our ICO goal is 400 ETH.

40% will be used for exchange fees.

35% will be used for external developer funds.

25% will be retained by employees for operational costs.

22,000,000.0000 FUCK tokens will be sold during the initial sale period.

20,000,000.0000 FUCK tokens will be distributed as bounties.

1,000,000.0000 FUCK tokens were distributed during the airdrop.

7,000,000.0000 FUCK tokens were distributed for work bounties prior to pre-sale.

21,000,000.0000 FUCK tokens will be held by the development team.

Any leftover bounty tokens will be reserved for future ICOs and product development. If the ICO goal is not reached, the remainder of the 20 million ICO tokens will be listed on exchanges.

### **Sale Period**

Presale began June 20<sup>th</sup> and ended June 25<sup>th</sup>. 2,000,000 FUCK tokens were sold.

ICO will begin July 13<sup>th</sup>, 2 PM EST and end July 30<sup>th</sup>, 2 PM EST.

### ***FUCK token ICO price:***

0.00002 ETH per FUCK token

For easier understanding, this equates to 0.2 ETH per 10,000 FUCK token or 1 ETH per 50,000 FUCK token.

ICO will end either when 20,000,000 FUCKs are distributed or July 30<sup>th</sup>, 2 PM EST whichever comes first. We will deploy a smart contract that has a hard cap of 20,000,000 FUCK tokens and post the address on our official website, <http://fucktoken.io/>.
